

Les petits animaux du sol

Voici quelques animaux que tu pourras rencontrer dans le sol. Ceux-ci, avec l'aide des champignons et des bactéries, décomposent les matières organiques en sels minéraux et en humus.

A quel dessin l'animal que tu observes ressemble-t-il le plus?

I. Animaux sans pattes articulées

Le ver de terre

La limace

Le nématode

La larve de tipule

II. Animaux avec des pattes articulées

Collemboles

Staphyllin

Carabe

Larve de mouche

Larve de coléoptère

Acariens

Opilion

Araignée

Pseudo scorpion

Cloporte

Symphyle

Géophille

Gloméris

Polydesme

Lhitobie

Iule
